Congressman William D Delahunt
House of Representatives
Washington, DC 20515

Dear Bill

Please find a solution that will permit major debt funding for the United Nations---a solution that will allow Congress and the president to agree.

One solution would be to pass a bill with UN Population Fund constraints with a follow on appeal by President Clinton to all other nations to fill the gap of funding for the UNPF. Restricting birth control information and materials condemns the undeveloped nations to perpetual poverty and yields a world of increasing environmental degradation. It is unkind.

A biproduct of lack of birth control in poorer nations is increased pressure of legal and illegal immigration into the United States.

Sincerely,
